Education

University of California San Diego — La Jolla, CA Sep 2023 – Dec 2026
B.S. in Mathematics—Computer Science
B.S. in Cognitive Science—Machine Learning and Neural Computation

- GPA: 3.96/4.00
- **Relevant Coursework:** Machine Learning, Deep Learning, Reinforcement Learning, Optimization, Numerical Analysis, Recommender Systems, Data Mining

Skills

Languages: Python, C/C++, JavaScript, Swift, HTML/CSS
ML: PyTorch, NumPy, pandas, scikit-learn, Transformers, representation learning
Tools/Cloud: Git, Linux, Claude Code, AWS Lambda, S3, DynamoDB, Xcode, MATLAB, LaTeX

Research Experience

Research Assistant Intern, MLPC Lab, UCSD — La Jolla, CA April 2026 – Present

- Investigating decoder-only autoregressive transformers for class-conditional ImageNet generation.
- Built PyTorch/Accelerate/FSDP training and evaluation pipelines; scoped scaling from 94M to 1B parameters.

Research Assistant Intern, ACM Lab, UNC Chapel Hill — Remote Sep 2025 – Present

- Designed and led development of a 200M-parameter fMRI foundation model for large-scale BOLD time-series representation learning.
- Pretrained on multi-cohort fMRI datasets, including HCP-Aging and UK Biobank; evaluated transfer performance on demographic and clinical prediction tasks.

Selected Projects

LLM Course Planning System — Swift, AWS, LLM Agents Jan 2025 – Feb 2026

- Built an LLM-driven multi-agent recommendation system using graph-based course knowledge representations for personalized academic planning.
- Developed a native Swift/iOS prototype with AWS Lambda, DynamoDB, S3, and CloudFront to support scalable backend computation, secure user authentication, and low-latency data delivery.

Work Experience

MATLAB Tutor, UCSD Department of Mathematics — La Jolla, CA Mar 2025 – Dec 2025

- Tutored 50+ undergraduate students in MATLAB, linear algebra, and differential equations through one-on-one debugging, conceptual review, and programming support.

Full-Stack Developer, UCSD CSSA — La Jolla, CA Jul 2024 – Oct 2024

- Prototyped a mobile community-engagement app and implemented backend data models, authentication, and client-server communication using Node.js and Tencent Cloud.

Honors & Awards

- SanD Hackathon MAS Challenge Winner — San Diego
- Valedictorian
- AMC 12 Certificate of Distinction
- MATHCON Finals, Honorable Mention — Chicago
